

CAPABILITIES

PRECISION MACHINING,
SOURCED ACROSS
METRO DETROIT

Four disciplines, one point of contact. Send a print and we coordinate manufacturing through a deep network of shops — any quantity, one-offs to production runs.

01 — GEARS & SPLINES · INTERNAL & EXTERNAL	1" - 240" DIA
QUANTITY	Any — one-offs through production runs.
CAPACITY	1" through 240" diameter (max).
MATERIALS	Steel, cast iron, brass, aluminium, plastic (Micarta).
GEAR TEETH	Spur, helical, bevel, spiral bevel, worm, rack, herringbone.
SPLINES	Involute and straight-sided.
OPERATIONS	Hobbing, shaping, slotting, broaching, shaving, tooth rounding, tooth grinding, gear grinding, gear racks, ID-OD spline grinding, EDM.

02 – GRINDING, POLISHING & HONING · ALL SURFACES		¼"–48" × 13'
QUANTITY	Any.	
CAPACITY	¼" through 48" diameter × 13' long.	
MATERIALS	Steel, cast iron, brass, aluminium.	
OD GRINDING	CNC cylindrical, centerless (to 20'), large roll grinding, contour, taper, thread, gear tooth.	
ID GRINDING	Honing, taper, jig.	
SURFACE GRINDING	Spline (internal & external), Blanchard, rotary, teeth.	

03 – TURNING		TO 156" DIA
QUANTITY	Any.	
CAPACITY	156" diameter × 96" swing (VTL); 42" diameter × 160" long; ¼" minimum.	
MATERIALS	Steel, cast iron, brass, plastic, aluminum, etc.	
TYPES OF PARTS	Large roll turning, spindles, axles, shafts, gear blanks.	
OPERATIONS	CNC, single or multiple spindle, bevel or contour, threading, screw machine, gun drilling.	

04 – MILLING, BORING & DRILLING		TO 6' CUBE
QUANTITY	Any.	
CAPACITY	Small ¼"–5"; medium thru 18"; large thru 6' square cube.	
MATERIALS	Steel, cast iron, brass, aluminium, plastics, etc.	
TYPES OF PARTS	Weldments, castings, forgings, extrusions, bar stock, flat stock.	
OPERATIONS	Five-axis CNC, single or multiple, drilling, tapping, reaming, Bridgeport, boring mill, clutch teeth, camslots & helix slots.
